

GenC Program

ADM DotNet FSE - Angular (Stage 2 Plus) Handbook

Program Overview

The **ADM DotNet FSE - Angular (Stage 2 Plus) training** is a 14.24-week immersive program designed to build full-stack engineering capabilities through a blend of:

- Self-learning modules
- Hands-on exercises
- Agile ceremonies
- Classroom sessions (Technical & Behavioural)
- Capstone project - Integrated Development Project (IDP)

All learning materials and exercises are hosted on the [GenC Learn](#) platform.

What is DevLed Skilling?

The **DevLed Skilling Program** is a transformative, project-based training initiative designed to simulate a real-world software development environment. Unlike traditional training models, DevLed immerses participants in an agile, collaborative, and delivery-focused setting from day one-mirroring the exact conditions of live customer projects.

Why DevLed?

- **Real-World Simulation:** Participants work in agile teams, attend ceremonies, and follow sprint cycles just like in actual delivery projects.
- **End-to-End Exposure:** From UI development to backend services, testing, logging, and DevOps, trainees experience the full software lifecycle.
- **Customer-Centric Mindset:** The training emphasizes delivering value to stakeholders, fostering a strong sense of ownership and accountability.
- **Hands-On Learning:** With guided exercises, classroom sessions, and a capstone project, learning is deeply practical, and outcome driven.
- **Day-One Billability:** By the end of the program, participants are equipped with the skills, mindset, and experience to contribute to real projects immediately ensuring day-one billability.

DevLed Training Structure (Agile Way)

Sprint	Duration	Phase Name	Modules/Courses Covered
Sprint 1	3.22 weeks	Project Environment Setup, Backend and Data Foundations	• Agile Methodology • Jira Basics • GIT Basics • Data Structures and Algorithms • Design Patterns and Principles • ASP.Net Core 8.0 • Entity Framework Core 8.0
Sprint 2	2.4 weeks	API Development & Testing	• ASP.Net Core 8.0 Web API • Application Debugging - Backend • NUnit, Moq • Code Analysis & Logging
Sprint 3	1.91 weeks	Microservices & Containerization	• Microservices with ASP.Net Core • Docker Basics
Sprint 4	2.51 weeks	Front-End Development	• Node.js Fundamentals • TypeScript Basics • Bootstrap 5 • Angular v20.0 • Application Debugging - Front-end
Sprint 5	2 weeks	Cloud, DevOps and Code Quality	• Cloud and DevOps Basics using Azure • SonarQube

Learning Components

1. Self-Paced Learning Materials (Udemy, Open-Source Learning Links)

- Hosted on **GenC Learn Learning Path - ADM-DE DotNet FSE – Angular (Stage 2 Plus)**
- Includes videos, readings, and quizzes
- **Note: It is NOT mandatory to complete the entire Udemy courses.** Learners are encouraged to **refer to specific sections that align with the training scope** for reinforcement and continuous learning.

Recommended Udemy Learning

The following section outlines the recommended external learning resources to supplement the core curriculum. While completing the entire course is not mandatory, learners are highly encouraged to utilize these as a secondary reference.

To optimize study time, GenCs should focus on the specific modules or sections of the Udemy courses that align directly with the technical scope of the current curriculum. These resources serve as a valuable tool for reinforcing conceptual understanding and providing additional practical examples beyond the classroom sessions.

Udemy Learning Mapping

Sprint	Course/Module	Udemy Course Name
Sprint 1	Agile Methodology	Agile Crash Course: Agile Project Management; Agile Delivery
	Jira Basics	Jira for Beginners - Detailed Course to Get Started in Jira
	GIT Basics	Git Complete: The definitive, step-by-step guide to Git
	Data Structures and Algorithms	Algorithms and Data Structures in C#: Complete Tutorial
	Design Patterns and Principles	Design Patterns in C# and .NET
	Entity Framework Core 8.0	Entity Framework Core - A Full Tour
	ASP.Net Core 8.0	The complete ASP.NET Core 9 course for busy developers Asp.Net Core 10 (.NET 10) True Ultimate Guide
Sprint 2	ASP.NET Core 8.0 Web API	ASP.NET CORE WEB API The Complete Guide
		Build ASP.NET Core Web API - Scratch To Finish (.NET8 API)
		Asp.Net Core 10 (.NET 10) True Ultimate Guide
Sprint 3	NUnit, Moq	Unit Testing for C# Developers
	Microservices with ASP.NET Core	Creating .Net Core Microservices using Clean Architecture
Sprint 4	Docker Basics	Docker for the Absolute Beginner - Hands On - DevOps
	Node.js Fundamentals	The Complete Node.js Developer Course (3rd Edition)
	TypeScript Basics	Understanding TypeScript
	Bootstrap 5	The Ultimate Bootstrap Guide - Bootstrap 5 from Scratch
	Angular (v20.0)	Angular - The Complete Guide (2025 Edition)

		Angular Testing Masterclass (Angular 20)
		Devtools Pro: The Basics of Chrome Developer Tools
	Sprint 5	Microsoft Azure: From Zero to Hero - The Complete Guide
		Azure Devops Crash Course -Build CI/CD release pipelines

2. Hands-On Exercises

- Available in the **GenC Learn Learning Path - ADM-DE DotNet FSE – Angular (Stage 2 Plus)**
- **Mandatory** for each sprint
- Includes key programming language and framework related aspects, coding challenges, and Integrated Capability Test

3. Classroom Sessions

- Daily sessions conducted by technical **SMEs**
- Focus on concept reinforcement, Q&A, and live coding
- **Attendance** is mandatory

4. Capstone Project - Integrated Development Project (IDP)

- Begins in Sprint 1 and continues through Sprint 5
- **Team-based** implementation of a full-stack application
- Evaluated on design, code quality and testing

Agile Ceremonies

Participants are expected to engage in:

- Daily Stand-ups (15 minutes)
- Sprint Planning (1 hour)
- Sprint Reviews and Retrospectives (1 hour)

These ceremonies simulate real-world agile environments and are essential for collaboration and progress tracking.

Evaluation Framework (Stage 2 Onwards)

To assess progress and readiness, the training includes **two formal evaluations** conducted by **BU Subject Matter Experts (SMEs)** on a one-on-one basis. These evaluations cover both technical competencies and project contributions.

1. Interim Evaluation

- **Timing:** After Sprint 2 (around Week 8)

- **Focus Areas:**
 - **Technical:** Foundational skills, agile practices, backend, data access and testing
 - **Project:** Hands-on completion, collaboration, initial project setup
- **Format:** One-on-one technical and project review
- **Outcome:** RAG (Red-Amber-Green) grading
 - **Green:** On track and progressing well
 - **Amber:** Needs improvement in specific areas
 - **Red:** Significant gaps in understanding or delivery

2. Final Evaluation

- **Timing:** End of Sprint 5 (Week 14)
- **Focus Areas:**
 - **Technical:** Full-stack development, microservices, code quality, DevOps
 - **Project:** Capstone project delivery, architecture, implementation, testing, deployment (local)
- **Format:** One-on-one technical interview and project walkthrough
- **Outcome:** RAG grading
 - Green status is expected for successful completion

Expectations & Completion Criteria

- Learn all self-learning modules
- Submit all mandatory hands-on exercises
- Participate in all agile ceremonies
- Attend classroom sessions
- Clear Interim and Final evaluations
- Successfully deliver the capstone project
- Clear Final HackerRank assessment
